

RHEUMATISM CONQUERED
At Home in Your Own Bathtub With Sulfur. Quit Dangerous Drugs.

You've fooled long enough with drugs that upset your whole system. You turn from one medicine to another as each one fails, after giving temporary relief. Why not try nature's own way? Rich people go to the hot sulphur springs and get nature's cure there, but how nature has revealed the secret of making sulphur soluble in water. The chemist who made the discovery calls it sulfad. A few ounces of sulfad in a tub of hot water gives you nature's cure for rheumatism, sciatica, lumbago, neuritis, etc. Throw away your dangerous drugs and try sulfad. You'll never go back to your drugs. Any druggist has sulfad or will get it for you.—Advt.

JEWS HONOR MR. STRAUSS ON SEVENTIETH BIRTHDAY

Ten Days' Drive Starts Here for \$150,000 for Palestine Fund.

Nathan Strauss is seventy years old today and the Jews of America are honoring him by special contributions to war relief work among Jews. In New York City a ten-day drive is being started among members of the various professions and trades to raise

\$150,000 for the Palestine Fund, of which Mr. Strauss is Vice Chairman. The American Jewish Relief Committee for sufferers from the War reports large contributions from many cities. St. Louis has pledged \$200,000, Denver \$50,000, Des Moines \$25,000 and Boston \$125,000. Henry H. Rosenfeld, assistant to Jacob J. Hillkopf, Executive Director, estimates that pledges will total nearly \$1,000,000. An open letter from Leon Kaminsky, Chairman of the Central Committee for the Relief of Jews Suffering Through the War, to Mr. Strauss, states that in his honor the committee has inaugurated a week of money from Jan. 27 to Feb. 3, and expects that the Jews of America will fitly and generously respond to the appeal for funds.

WADSWORTH LEADS SENATORS' ATTACK UPON WAR SYSTEM

Republicans Preparing to Put Strong Support Behind War Council Measure.

WASHINGTON, Jan. 31.—The Republican barrage on War Department delays is under way in the Senate. Numerous members are preparing speeches designed to throw heavy support back of the Chamberlain "War Cabinet" bill, even before it gets out of committee.

Senator Wadsworth of New York will probably lead the attack. He is directing his fire on "the faulty system, delays, breakdowns, inefficiency and lack of co-ordination" in the War Department.

Wadsworth has prepared elaborate charts showing how, under the present system, there are three unofficial boards between the President and the war making agencies. These are the War Industries Board, the Council of National Defense and the Clearance Committee of the Council—with no clear cut line to define the work of any of these organizations.

Another chart shows how the War Cabinet, coming between the President and the war making agencies, combines in one body all the functions of the three unofficial ones and adds to that a coordination of the authority of the law.

The committee, meanwhile, continued its investigation. Howard Coffin of the Aircraft Board is to be recalled for further testimony.

Coffin, it developed today, came out strongly before the committee in favor of the War Cabinet and Director of Munitions plans.

Senator Chamberlain said today he does not know what will result from his conference with Secretary of War Baker at luncheon yesterday, in which Baker accepted the principle of co-ordination plans but frowned on Congressional action to force the reorganization.

It developed today that the Military Committee has taken sides with Provost Marshal General Crowder against Baker in the matter of exempting men from the draft as they pass the age of thirty-one.

Baker wants this and says it is provided for in a bill now pending. The bill clearly does not provide for it, and the committee today refused to amend it, as Baker wished.

URIC ACID IN MEAT BRINGS RHEUMATISM

Says a little Salt in water may save you from dread attack.

Rheumatism is easier to avoid than to cure, states a well-known authority. We are advised to dress warmly; keep the feet dry; avoid exposure; eat less meat, but drink plenty of good water.

Rheumatism is a direct result of eating too much meat and other rich food that produce uric acid, which is absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp, cold weather the skin pores are closed, thus forcing the kidneys to do double work; they become weak and sluggish and fail to eliminate the uric acid, which keeps accumulating and circulating through the system, eventually settling in the joints and muscles, causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lit-lit-water drink which helps overcome uric acid and is beneficial to your kidneys as well.—Advt.

THIS YEAR MUST DECIDE WAR'S ISSUE WILSON DECLARES

(Continued from First Page.)

only and have had the privilege to play such a part."

The President declared in opening his message, "that we are as a Nation in the presence of a great task which demands supreme sacrifice and endeavor of every one of us."

"We can give everything that is needed," he declared, "with the greater willingness and even satisfaction, because the object of the war in which we are engaged is the greatest that free men have ever undertaken. It is to prevent the life of the world from being determined and the fortunes of men everywhere affected by small groups of military masters who seek their own interest and their selfish dominion throughout the world of the governments they unhappily for the moment control."

"You will not need to be convinced that it was necessary for us as a free people to take part in this war. It had raised its evil hand against us. The rulers of Germany had sought to exercise their power in such a way as to shut off our economic life as far as our intercourse with Europe was concerned, and to confine our people within the Western Hemisphere while they accomplished purposes which would have permanently impaired and impeded every process of our national life and have put the fortunes of America at the mercy of the Imperial Government of Germany."

"This was no threat. It has become a reality. The hand of violence had been laid upon our own people and our own property in flagrant violation not only of justice but of the will of the civilized world, standing covenants of international law and treaty."

Statements on both sides of the water in a realistic, but not in a pessimistic, way. And to show the resources at hand with which to launch the mighty blow he cited the agricultural resources of the United States, pointing to the Department of Agriculture with its annual budget of \$15,000,000, which has been in record during the last four years more than 72 per cent of the cost of \$1,000,000, the land grant colleges and the sixty-nine State and Federal experiment stations.

The President also referred to the "very effective voluntary organization among the farmers themselves" and the banking legislation for farmers' benefit in the last two or three years.

LABOR PROBLEM OFFERS SOME GREAT DIFFICULTIES.

"The labor problem is one of great difficulty," said the President, "and some of the best agencies of the nation are addressing themselves to the task of solving it, so far as it is possible to solve it. Farmers have not been exempted from the draft. I know that they would not wish to be. But the attention of the War Department has been very seriously centered upon the task of interfering with the labor of the farms as little as possible, and under the new draft regulations I believe that the farmers of the country will find that their supply of labor is very much less seriously drawn upon than it was under the first and initial draft."

"The President said that the farmers of this country are as efficient as any other farmers in the world."

"They do not produce more per acre than the farmers in Europe," he continued. "It is not necessary that they should do so. It would perhaps be had economy for them to attempt it. But they do produce by two or three or four times more per man, per unit of labor and capital than the farmers of any European country."

"They are more alert and use more labor saving devices than any other farmers in the world. And their response to the demands of the present emergency has been in every way remarkable."

The President recalled the farmers' past achievements, and then said: "But I ought to say to you that it is not only necessary that these achievements should be repeated, but that they should be exceeded. I know what this advice involves. It involves not only labor but sacrifice, the painstaking application of every bit of scientific knowledge, and every tested practice that is available. It means the utmost economy, even to the point where the pinch comes."

"It means the kind of concentration and self-sacrifice which is involved in the field of battle itself, where the object always looms greater than the individual. And yet the Government will help and help in every way that is possible."

"The impression which prevails in some quarters that while the Government has sought to fix the prices of foodstuffs, it has not sought to fix other prices which determine the expenses of the farmer, is a mistaken one. As a matter of fact, the Government has actively and successfully regulated the prices of many fundamental materials underlying all the industries of the country, and has regulated them not only for the purchase of the Government, but also for the purchases of the general public, and I have every reason to believe that the Congress will extend the powers of the Government in this important and even essential matter so that the tendency to profiteering which is showing itself in too many quarters may be effectively checked."

PLANDOME HOME BURNS.

Henry F. Holbrook's House, Valued at \$25,000, Is Destroyed. The residence of Henry F. Holbrook, in Plandome, Nassau County, valued at \$25,000, was totally destroyed by fire last night. Fire apparatus came from Manhattan, Great Neck and Port Washington, but because of two frozen hydrants were compelled to strike 700 feet of hose before water could be obtained. The fire was discovered by a neighbor, who telephoned to the firehouse. The back of your house is on fire. It is not known how the fire started.

BLOW UP WAS ACCIDENT.

Naval Officials Absolve Allen Enemies of Newport Station Explosion.

WASHINGTON, Jan. 31.—The recent explosion at the naval torpedo station at Newport, R. I., was not the work of an enemy, naval officials are now fully convinced, after a careful investigation. Reports to the Ordnance Bureau show 125 pounds of fulminate of mercury were destroyed by the explosion, which occurred in the dry house, located in a former bomb-proof.

"The relatives and friends of the men killed must appreciate the fact that they have given their lives for their country in a manner deserving as much praise as if they were in the trenches opposite enemy forces," said Rear Admiral Farie, Chief of Ordnance, in a letter today extending the Government's sympathy and condolence to the families of the men.

Folk to Leave Commerce Commission Before Feb. 15.

WASHINGTON, Jan. 31.—Joseph W. Folk today sent to the Interstate Commerce Commission his resignation as the Commission's chief counsel to take effect before Feb. 15. Announcement of his intention to resign was made known several days ago. He will return to his home in St. Louis to become general counsel of the Chamber of Commerce there. It was said today the commission has not appointed a successor during the war or as long as Government operation of railroads continues.

The one True Aspirin—the Aspirin you have always relied upon—is absolutely identified.

"The Bayer Cross—Your Guarantee of Purity"

The trade-mark "Aspirin" (Reg. U. S. Pat. Off.) is a guarantee that the product is authentic and of value in these tablets is of the reliable Bayer manufacture.
